30 January 1969

COINS User Training Panel

Meeting of 23 January 1969

1. In attendance:

[Redacted]

STAT

3. Several items were exchanged:

a. Draft of [Redacted] instruction material

b. New general write-up on two files, one each by DIA and CIA, and a republication by NSA.

[Redacted]

STAT

d. The near-final draft of the DIA instruction manual was available for inspection.

4. [Redacted] arranged for [Redacted] to brief the Panel on the NPIC contribution to COINS files. Security considerations will permit little information to flow out to COINS Users on the network, but the file which will be included will suggest the availability of information which can then be sought through appropriate channels.

STAT

5. NIC still does not have its terminal machines, thus avoiding the problems of those who do: getting through the switch, and getting answers.

Approved For Release 2006/02/06 : CIA-RDP80B01139A000100090002-2

6. The subject of TV or movie representation of COINS in action was raised again, and will be discussed next time. The NSA TV facility is based on an AMPEX 660B; records will play back only on the same type of equipment.
